Rain Barrels

Save The Rain For A Sunny Day!!

A rain barrel connected to your downspout is a great way to cut down on your water bill!

Benefits of Diverting Water from the Downspout:

- Naturally softened water – great for delicate houseplants, window and auto cleaning
- Saves money by lowering your water bill
- Chlorine-free water helps maintain a healthy biotic community in the soil
- Lowers the percentage of roof top rainfall as a component of urban runoff
- Backup source of water during times of drought or between rain showers

The Rain Barrels have a bottom drain plug, screw on top with one inch holes, screen mesh to keep out debris and mosquitoes.
